### ***Allowable Subject Matter***

1. Claims 18-19 allowed, renumbered as 1-2.
2. The following is an examiner's statement of reasons for allowance:

No prior art teach or suggest a system for monitoring body temperatures in a plurality of herd animals, comprising:

a plurality of radio frequency identification transponders, each said transponder having a temperature sensor for sensing animal temperature, each herd animal provided with one of said radio frequency identification transponders, each transponder positioned such that said temperature sensor is in a viable sensing location for sensing the animal's temperature;

a reader/interrogator for:

transmitting radio frequency signals to said transponders;  
receiving radio frequency signals from said transponders, said received  
radio frequency signals containing animal temperature data from said  
temperature sensors; and

demodulating said received radio frequency signals into animal  
temperature data;

a memory for storing said animal temperature data; and

a microcontroller in communication with said reader/interrogator and said  
memory, wherein said microcontroller is for:

processing said animal temperature data and determining a baseline  
temperature for each animal by averaging said temperature data for each animal  
overtime; and

providing an alarm indication when temperature data from any herd  
animal deviates a set percentage from said baseline temperature for said animal.

Any comments considered necessary by applicant must be submitted no later  
than the payment of the issue fee and, to avoid processing delays, should preferably
